

Basic Specifications

Wire Colors	Function
Red	V+ (11-28V DC)
Brown	V- or GND (0V DC)
White	Strobe Enable - Input
Yellow	WigWag Enable – Input
Green	WigWag Sync – Output
Specifications	
Supply Voltage	11 – 28 VDC
Power Usage	1.4A at constant illumination (11V) 0.7A Strobing (single light) or WigWag (2 Lights)
Wattage	15W (Constant illumination) , 7.5W Strobing
Lumens	1950 lumens, 13 Degree Beam
Maximum on time	1. Fixed Beam – No more than 20 minutes 2. Fixed Beam with forced cooling (outside mount with free air flowing over light) – No more than 30 minutes 3. Strobe or WigWag – No limit
Protection Rating	IP65 with full immersion – This is the desing and is preliminary. Must still be tested
Functions	
1. Fixed Beam	
2. Strobe	For single or multiple lights
3. WigWag	For Dual Light installations

Next page , installation wiring

Single Light / One Switch / Flashing
